

Primary data sources for the Odense AEE / functional URC analysis

Data layer	Details	Source	Year / reference date
BBR buildings	Address-linked buildings; residential floor area (BYG_BOLIG_) as dasymetric	Danish Building and Dwelling Register (BBR); OD Buildings_2020	2020
GeoDanmark buildings / built-up	Building footprints and built-up land-cover classes	GeoDanmark via Datafordeler (GEODKV); Dataforsyningen / Klimadatastyrelsen	~2023 (downloaded 2026-07-29)
GeoDanmark land use / land cover	Natural/green, water, and related land-cover polygons	GeoDanmark via Datafordeler (GEODKV); Dataforsyningen / Klimadatastyrelsen	~2023 (downloaded 2026-07-29)
GeoDanmark road network	Road centre-lines and attributes; major roads for exposure buffers	GeoDanmark via Datafordeler (GEODKV); Dataforsyningen / Klimadatastyrelsen	~2023 (downloaded 2026-07-29)
OpenStreetMap (OSM)	Walk/bike networks, amenities, public-transport stops	OpenStreetMap contributors; OSMnx/Overpass (Geofabrik.com)	Retrieval snapshot; analysis GPKG 2026-07-29
StatBank SOGN / POSTNR / FOLK1A	Parish and postcode population counts; municipal control total	Statistics Denmark StatBank	2022–2026 (FOLK1A ≈ 213,431)
DST Kvadratnet density classes	1 km density interval classes for soft constraint / validation	Statistics Denmark Kvadratnet extranet	~2019
Protected / §3 nature	WDPA protected areas and Danish §3 / areal nature	Protected Planet (UNEP-WCMC); Landbrugsstyrelsen (LBST)	2026 (WDPA/LBST pulls)
Summer land-surface temperature	Mean summer LST for environmental composites	ESA CLIM4cities Sentinel-3 SLSTR (Zenodo)	Jun–Aug 2020–2023
State-road traffic noise (Lden)	Noise exposure along state roads	Vejdirektoratet Støjkortlægning af statsveje	2022
Air pollution proxy (NO ₂)	Interim regional NO ₂ surface (CAM5-based)	Open-Meteo Air Quality API	2026-07-29
Dasymetric population (500 m hex)	Preferred density surface (SOGN × BBR; FOLK1A; DST soft-constraint)	Derived product (this study)	2026-07-31

Notes: GeoDanmark via Datafordeler/Dataforsyningen (Klimadatastyrelsen portal). Population density is dasymetric (not paid DST person counts). PT accessibility = OSM stop potential (no GTFS). Migration-origin fields excluded.
